

# **Technical documentation of Shoper and Click Shop integration process with the BitBay Pay payment gateway**

Version 1.0 – 28.08.2019

<b>1. Introduction</b>	<b>3</b>
<b>2. Creation of access to API</b>	<b>4</b>
<b>3. Payments configuration</b>	<b>6</b>
<b>4. Contact and technical support</b>	<b>7</b>

# 1. Introduction

In the document you will find information on the integration of Shoper and Click Shop platforms with BitBay Pay gateway. Settings and options of the payment gateway and the BitBay Pay administration panel described in documentation are available after prior activation of Shoper or Click Shop support each store separately, after logging into your BitBay Pay account.

## 2. Creation of access to API

Create a new user with access in the administration panel of the Shoper or Click Shop store to webapi. In order to do this, log in to the dashboard panel of the store at:

(shop address)/admin

From upper menu please choose: [Configuration](#) -> [Administration, system](#) -> [Administrators](#).

Create a new group of administrators, As a group name fill webapi, and as Type of access choose: [access to webapi](#). Next – click [Save](#) at the bottom of a menu.

In next step please proceed to [Permissions](#) and set options as follow:

[Sale – read, add, edit](#)

[All other options – no permissions](#)

In Administrators bookmark add a new user [bitbaypay](#). Thanks to this your shop will be able to communicate with BitBay Pay payment gateway.

Listed options fill as follow:

1. Name and Surname - BitBay Pay
2. Login – bitbaypay
3. E-mail – [it@bitbaypay.com](mailto:it@bitbaypay.com)
4. Group – webapi
5. Password – any password
6. Repeat password – as given above

Values given in [Login](#) and [Password](#) enter again in dashboard panel in BitBay Pay – [Settings/Shop engines -> Shoper](#)

After saving the data for integration, the system will automatically check the correctness of the data entries. If the data is correct, it will show the HTML code, which should be used in online store.

### 3. Payments configuration

In order to configure payments correctly please proceed to section [Configuration](#) -> [Sales](#) -> [Payments](#).

Above the list of available payment methods you will find the link: + (add new payment) or the button [Add payment](#), when you choose it, the form for adding a new form of payment will appear. Complete the form with the following data.

Type of payment: [transfer](#)

Name: [bitbaypay](#)

Description: [cryptocurrencies payments](#)

Activity: [YES](#)

Processed currencies: [PLN – Złoty polski](#)

Then create a message that will be displayed after placing the order. In order to do this, select option [View - Source code](#). In the window that appears, paste the form available in the BitBay Pay dashboard panel in the store details and in the [Data for integration](#) section.

Save the content by clicking [Ok](#).

Add a new payment method by clicking the [Save](#) button, which you will find at the bottom page.

After completing the above steps, provide [BitBay Pay](#) for all forms of delivery through the option: [Configuration](#) -> [Sales](#) -> [Deliveries](#) and select from the list [Supported payments](#) -> [BitBay Pay](#).
